About OxDoodles

OxDoodles 2 days ago · 4 min read

What is OxDoodles?

At the first sight, one may confuse our NFT collection with Doodles, perhaps one of the best known NFT collections in the world. But let us clarify.

OxDoodles is **NOT** affiliated or associated with Doodles. This is a separate collection, created by a separate team of developers, with different objectives. Yes, we do pay homage to the OGs. Our project is not emulation, but rather a celebration of artistic inspiration and a vibrant community. OxDoodles has separate traits, variations, attributes in its art and a different vision, mission and pursuit in its spirit.

The entire focus of this project is the advancement of our aims and objectives with our community as an anchor. We want our stakeholders to be part of the decision making process, and we want the OxDoodles to be the masters of the fate of this project, with our team being the executing body. Everything from the **mint price** to the **mint date** will be decided by the OXGs of the OxDoodles community!

THE ART

The OxDoodles have completely different and visually distinguishable traits and attributes, and are artistically inspired from the Doodles, and appear similar but are far from identical. The layers that constitute the art of OxDoodles are also uncommon and unique, and have been influenced by a variety of art styles not restricted to any one collection or series.

ROADMAP

25% sold — After 25% sale of the total NFTs, a 0xDAO will be formed (you can learn what a DAO is [here](#)). The reasoning for this is simple; OxDoodles exists because of decentralization, and our enthusiasm behind the technology is a very pertinent reason for the founders venturing into NFTs and rallying behind the cause. The OxDoodles is a project that is *BY THE COMMUNITY FOR THE COMMUNITY* and every decision in our mechanism will be taken by the community. This includes merchandise, physical figurines of the NFTs, land in the Metaverse among many other exciting prospects!

50% sold — After 50% sale of the total NFTs, OxDoodles will buy a Doodle/0xApe. However, this is just an initial pitch by the founding team, as the decision on the buy will be taken by the DAO and the buy will be finalized as the community votes on it. The point is, whatever the community rallies behind and supports, the DAO will invest in and throw their weight behind. Power to the people!

Why DAO?

OxDoodles exists because of decentralisation. The project is by the community for the community and every decision will be OURS. Right from the mint price to Launch Date.

Why buy a Doodle / 0xApe?

The Doodle and OXApe is place in order to initialise our first buy as a community. Frankly it can be anything we decide on as a whole to support and invest in.

75% sold — After 75% sale of the total NFTs, OxDoodles will do a giveaway of a Doodle! We know that a giveaway like this can change a life for the better, and the OxDoodles is all about positive change. We also want to do our part in paying homage to the collection without which OxDoodles would not have been conceived.

100% sold — After 100% sale of the total NFTs, OxDoodles will be forming their own marketplace, where OxDoodles can be viewed and traded on this platform. We strongly believe that every project must leverage its position to empower other creators, especially women and we will shine a spotlight on deserving artists and creators from around the world working in the NFT space through this platform. \$DOOD will be the fractional token of OxDDAO, and will serve as the currency of our marketplace (akin to \$LOOKS). On the marketplace itself, trading will be in ethereum, and marketplace and trading activity will be rewarded in \$DOODs, the native currency of the marketplace.

Why giveaway a Doodle?

Why Not? It changes someone's life for the better and we get to show our little bit of support to the project which inspired art for OxDoodles.

Marketplace?

Yes! We firmly believe that every project should have their own Marketplace. \$DOOD (fractional token of OXDAO) will serve as currency of our Marketplace (Like \$LOOKS)

HOW DO THE ROYALTIES WORK?

The royalties for the project are set at 2.5%. This means that from every sale on the secondary market, 2.5% of the amount will go back to the OxDoodles. Out of this 2.5% amount, 50% of the royalties from the amount will be distributed among the holders of OxDoodles with the rare OxG trait. The OxG trait is only present in 99 of the total OxDoodles, and is part of a blind mint.

What about the Royalties?

This is OUR project. Royalties for the project will be 2.5%. Out of which 50% of the royalties from the project will be distributed among the holders of OXDoodles, with a Special trait called - (OxG) . These OXDoodles will be 99 in total and a part of the blind mint.
